Waccamaw Watershed Academy,
Center for Marine & Wetland Studies, Coastal Carolina University

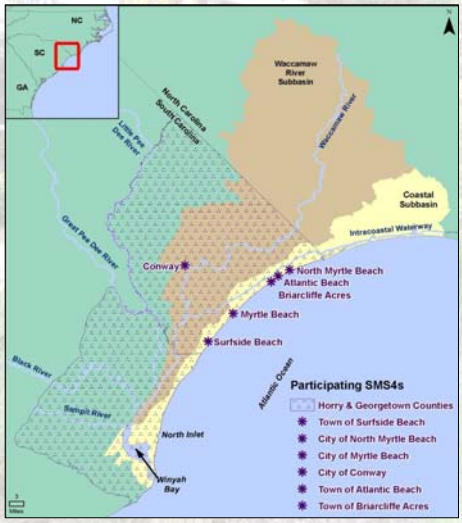
Coastal Waccamaw Stormwater Education Consortium

Coastal Waccamaw Stormwater Education Consortium

Goal

Develop and implement effective, outcomes-based stormwater education and outreach programs to meet federal requirements and satisfy local environmental and economic needs.

Participating Communities



These municipalities encompass over 2,000 square miles of land with approximately 300,000 residents.

Coastal Waccamaw Stormwater Education Consortium

Education Providers

Coastal Carolina University's Waccamaw Watershed Academy

North Inlet-Winyah Bay National Estuarine Research Reserve Coastal Training and Public Education Program

Clemson University's Carolina Clear Program

SC Sea Grant Extension Program

Waccamaw Riverkeeper®

Murrells Inlet 2020

Sustainability
We view environmental sustainability as one of the most important opportunities for both the future of our business, and the future of our world.
Our opportunity is to become a better company by looking at every facet of our business—from the products we offer to the energy we use—through the lens of sustainability.
Environment
Wal-Mart's environmental goals are simple and straightforward: to be supplied 100 percent by renewable energy; to create zero waste; and to sell products that sustain our natural resources and the environment.
Sustainable Value Networks
With the help of our Sustainable Value Networks, we are making progress toward our goals. Sustainable Value Networks bring together leaders inside of Wal-Mart along with leaders from supplier companies, environmental groups, academia and government to focus on everything from the energy we use in our stores to the packaging used on products.
Sustainability Goals
The steps we take to help us meet these goals are not only good for the environment—they are good for our business, too. For instance, by increasing the fuel efficiency of our trucks we will
Think About This:
Wal-Mart's Acres for America program has permanently conserved 395,000 acres, more than three times the original goal of the program.

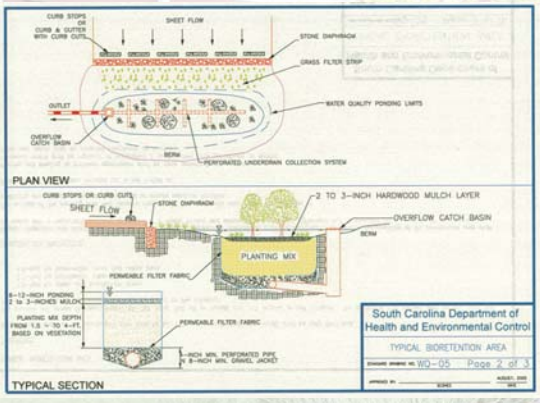
How to Build a Rain Garden



Rain Garden Materials:
- 50 – 60% Sand
- 20 – 30% Top Soil
- 20 – 30% Compost
- Check native soil first!
- Native plants
- Dense-material mulch

➢ In well-drained, sandy soils ~ 20% of the drainage area or impervious area (rooftops, driveways, etc.)

➢ In poorly drained, loamy soils, 20% to 60% of impervious area

Source: Dan Hitchcock, Clemson University

Coastal Waccamaw Stormwater Education Consortium

The Final Product

Planting in June '06

1 Year Later – August '07

Coastal Waccamaw Stormwater Education Consortium

Socastee High School Check Presentation on December 5, 2007

$14,000 from 5 Wal-Mart stores for stormwater Best Management Practices (BMPs)

- Infiltration swale & bioretention cell with under drain systems
- Sand, compost, native SC plants, mulch and sod
- Educational & research equipment

Also served as media event to introduce stormwater BMP concept

Coastal Waccamaw Stormwater Education Consortium

Socastee High School BMP Installation on April 11, 2008

Bioretention cell to collect roof runoff

Infiltration swale to improve drainage of athletic fields

Media returned for action shots and story

Coastal Waccamaw Stormwater Education Consortium

Burgess Elementary Installation
on October 22, 2008

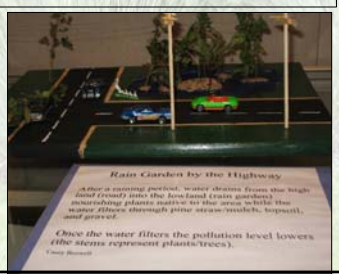
$8,000 donated by 2 Wal-Mart stores

Garden to collect runoff from bus loading area

Coastal Waccamaw Stormwater Education Consortium

Curriculum Development by Burgess Elementary

Models of polluted runoff, rain gardens and good stormwater practices

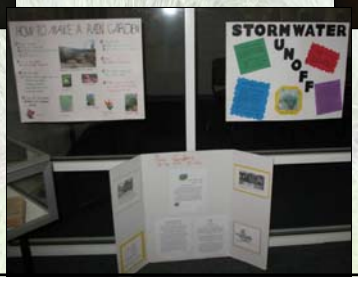


Coastal Waccamaw Stormwater Education Consortium

Follow-up Event
by Burgess Elementary Students

Brochures and posters of stormwater runoff and rain gardens and barrels

Displayed for parents and community



Coastal Waccamaw Stormwater Education Consortium

Conway High Installation
on November 20, 2008

$8,600 donated by 2 Wal-Mart stores

Science and Horticulture classes participated

Cell designed to collect runoff from adjacent parking lot

Coastal Waccamaw Stormwater Education Consortium

Georgetown High Installation on December 3, 2008

$5,000 donated by 1 Wal-Mart

Installed in 1 day – construction in a.m. and planting/mulching in p.m.

Coastal Waccamaw Stormwater Education Consortium

Curriculum Development by Georgetown High

Making and painting rain barrels to be donated to other schools

Student Rain Garden Competition

Generously funded by Wal-Mart

AIM: The competition is to have GHS students promote our rain garden in a fun and educational manner to fellow school district students and their community.

The ***three categories*** that students shall focus on to promote and explain the benefits of rain gardens are:

A song about rain gardens,

A sign providing a rain garden overview to be placed at the rain garden, and

A brochure, video, or commercial explaining how to make a rain garden at your home or in our community in general.

Coastal Waccamaw Stormwater Education Consortium

Myrtle Beach Intermediate Installation on January 16, 2009

$4,500 donated from 1 store

First joint project by 2 stormwater departments

Coastal Waccamaw Stormwater Education Consortium

Educational Activities & Equipment

- Monitoring

  Water Quality – colorimeter; portable pH/conductivity meter

  Rainfall/weather conditions - Davis Wireless Vantage Pro 2 Weather Station

- Habitat

  Bioassessment – magnifiers, insect nets

- Watersheds

  Land Uses & Effects – Enviroscape Model

Coastal Waccamaw Stormwater Education Consortium

Curriculum Follow-Up

The drain is just for the rain!

- Install rain garden and/or rain barrels
- Plant shrubs and trees – vegetated buffers
- Storm drain stenciling
- River/beach sweeps
- Scoop the Poop! Campaign

Coastal Waccamaw Stormwater Education Consortium

Lessons Learned

School	Funds	Lessons Learned
Socastee High	$14,000	Have check presentation & planting on same day
Burgess Elem.	$8,000	Elementary students love being involved
Conway High	$8,600	Needed design adjustments
Georgetown High	$5,000	Too much for one day
Myrtle Beach Intermediate	$4,500	Smaller funding requests better

Total Funding (12/07 – 1/09): $40,100
